

noblessa
finest german kitchens

noblessa

At the founding of their kitchen company in 1945, the harmony of functionality, design and the highest quality was already a central claim of the brothers Johann and Willy Stickling. Based on the ideals of German engineering, "technical excellence" became a standard for their entrepreneurial activities. Later, the company rose to become the biggest kitchen manufacturer in Europe under the name nobilia.

In 1996, Heinz and Werner Stickling created the premium brand noblessa. Under this name, from now on, kitchens were only offered for kitchen specialists and higher standards.

Purchasing a new fitted kitchen is something very special, and it should be planned carefully. Indeed, before you begin planning, you need the right inspiration and reliable information regarding all aspects of your kitchen.

In our current Kitchen Journal, we provide you with plenty of suggestions and ideas to help you create your dream kitchen. We will show you different types of kitchens, superb décor elements, colours and finishes, special architectural solutions, high-quality kitchen technology and versatile accessories. We will help you to be well-informed before you begin planning the details of your kitchen with your kitchen specialist.

Discover the variety and the design possibilities contained in our latest kitchen collection. Whether you are looking for a designer kitchen or one that is modern and inviting, a kitchen inspired by nature or with the look of a modern cottage we are sure you will find your favourite here.

We hope you enjoy reading our latest Journal.

Design and lifestyle – everything works together here!

The storage-packed kitchen and adjacent living area in this design suggestion merge into a seamless aesthetic entity in elegant Slate grey. Our Color Concept décor Rusty Plates reproduction creates exciting accents in the popular metallic look. Selective use of open shelf elements and tablar pull-outs relaxes the straight lines of this XL kitchen architecture.

Sliding doors allow a playful exchange between open and closed surfaces and skilfully create homely accents. Moreover, they are simply incredibly practical.

Favourite colour White

White continues to count among the most popular furnishing colours, because White is timelessly beautiful and it just feels good. White is unobtrusive, it makes rooms look and feel larger, and it outlasts the whims of fashionable trends. In addition, White is incredibly versatile and changeable. White can hold its own against coloured accents and vibrant contrasts as well as with cool metals and natural wood tones, making it the perfect choice for both small and large dream interiors.

The Black Smartcube frame coordinates beautifully with the glass recess panel in Masterflow black matt.

noblessa

A stylish mix with urban flair!

The sophisticated fronts in supermatt Black provide the perfect backdrop for a wide variety of modern design possibilities.

Whether with swivel flap doors in the trend décor Oriental, with GAP design fronts or with Frame wall units in Black matt – the possibilities for individualised material and colour combinations are endless.

Island solutions in inviting concrete look

Concrete has the reputation of being cold and uncomfortable – we beg to differ!

The White concrete reproduction décor in this design brings a subtle, warm colouring to the minimalistic, cool concrete look. It harmonises splendidly with the dry stone wall décor niche cladding and the restrained wooden flooring.

noblessa

Andreas Bielefeld

For us, the design of luxury kitchens is a continual process. Almost daily, new trends in colouring and materials are incorporated into the designs, along with changes in lifestyles and styles of home living. The results of our work: each year another collection with exquisite new additions. Andreas Bielefeld has been with the company since 2000. He came to furniture design via his study of foreign trade, which gave him his sensitivity to trends and developments. From initially dedicating himself to seating and upholstered furniture, he is now inseparably associated with kitchen design, in which he is a leading figure.

Clear design

With our handleless LINE N range we have been raising the bar for design-oriented and on-trend kitchen style for years. In conjunction with fronts in popular solid colours or wood décors, or matt or high gloss – with its fine lines, the front design always expresses quintessential modernity and sleek elegance.

noblessa

Ceramic look in XL size

Colours from nature and natural-look wood finishes are simply a perfect solution when it comes to making your kitchen inviting. With an extensive collection of wood décors – which are second only to nature in their appearance and texture – you are sure to find your natural-looking favourite.

noblessa

Shining moments!

High gloss surfaces in lacquered laminate or lacquer make our kitchens the shining star of your home. And that is totally independent of the size of the kitchen.

Whether you choose a closed kitchen, whether you have room for a spacious island solution or whether you prefer an open concept that includes the living area – there are no limits to your individual wishes here. The well-thought-out kitchen system, the multiplicity of the sophisticated materials and material combinations as well as the superior quality of the kitchen technology invite you to use your creativity in designing your dream kitchen.

Ingenious design!

The Smartcube shelf unit system opens up fascinating design possibilities in contemporary style. With Smartcube, kitchens take on a more open and inviting design. They can also be used to beautifully stage adjacent living areas.

Smartcube shelf units are available as wall and base unit solutions, as well as special island solutions. The aluminium frame comes in your choice of Black or Stainless steel finish.

For shelves and the optional back panel choose your favourites from among all the carcass and COLOR CONCEPT colours.

Clever, flexible and fit for
everyday use!

Steel: for a professional look

If you would like to take the professional look of your kitchen to the next level, then our new Metal Concept décors are right for you. Scratched steel reproduction is the epitome of the metal look, and the distressed character of the finish brings a touch of industrial chic to the kitchen. The décor is extremely versatile, as wall unit fronts, upright panels, niche cladding or as panels, and it can be combined beautifully with all solid colours, stone and concrete décors, even with wood décors.

When there is absolutely no extra space for a separate dining area, why not try an integrated solution

Create highlights! Individual recess panels, wall unit fronts and wall shelves in Black are a stunning complement to fronts and worktop in ceramic look.

Ceramic look in XL size

Short distances, smart work sequences and cleverly structured storage space are the most important aspects of kitchen planning. Kitchens with a U-shape are often a good solution, especially for small floor plans.

Cottage style kitchens à la carte

Out of fashion? Not at all! The modern cottage style kitchen is more popular than ever!

Classic design and traditional shapes meet innovative kitchen technology and the highest degree of comfort and ergonomics. Countless carefully chosen details such as framed glass doors, wickerwork baskets and pilasters give our cottage style kitchens a cosy flair and turn your kitchen into the comfy heart of your home.

A modern composition!

The baguette unit with a footprint of just 30 cm has a fixed metal storage shelf, a linen baguette bag and room for 4 bottles.

The lighted railing system is a practical as well as beautiful accessory and generates a uniform ambient light.

Modern classic look

Straight-lined framed doors are genuine crossover artists between contemporary and classic shapes and thus offer a wide playing field for totally individualised creations. Framed doors in wood décors lend kitchens a contemporary, natural look. Light and dark contrasts emphasise the more classic design approaches. Light earth tones – such as our Savannah – are particularly suited to cosy compositions in classic style.

With a love for detail

The incomparable material aesthetic of genuine lacquer is certainly something special. The high quality workmanship of these refined framed doors lends our cottage style kitchen a timeless quality that retains its value.

The kitchen storage wonder!

What is the best way to organise my base units, how many cutlery trays do I need, which waste separation system should I choose, what is more practical here – a larder unit or a pantry unit with internal pull-outs?

You will find plenty of suggestions and ideas for outstanding kitchen organisation on the following pages.

noblessa

The new kitchen is here!

This kitchen, which is only about 15.5 m², is a perfect example of just how much an average household can accommodate. With the right kitchen components, functional interior fittings and practical accessories. With kitchen architecture that provides ample storage space and a design that incorporates ergonomic considerations. So, just how do you arrive at your perfect kitchen? It is very simple. Your kitchen consultant is there to help you realise all your dreams and desires.

Cosy elements & accessories

Even in architecturally planned kitchens, base units with tablar pull-outs relax the line of base units with homely accents. The anthracite coloured metal tablar pull-outs are optionally available with panels in matt glass, black glass or solid oak wood.

Made to measure storage!

Tall units are real storage wizards – they provide space for a wide variety of storage forms thanks to special interior divisions. Our tall units are available in three different unit heights as well as a highboard.

They can come equipped with convenient, durable and sturdy mechanisms.

See your kitchen in the right light!

The right lighting concept supports optimum working conditions and effectively showcases the new kitchen.

In addition to general room lighting, creating additional small island of light mainly near the seating areas in the kitchen makes for a homely and comfortable ambience.

The EVOline socket Square 80 is equipped with an USB charger. The sliding cover is designed as an inductive charging station for wireless charging of suitable smartphones.

The double socket Toki is equipped with a USB charger for charging smartphones and tablets. The integrated speaker enables audio playback via Bluetooth.
